

Safe Seafood Company CO., LTD is a company marketing best quality Vietnamese seafood products worldwide. Its re in the international seafood market.

Safe Seafood is a team of qualified Marine Industry professionals with considerable experience in production management and quality control of marine products. In addition to professional fish industry qualifications, the team has certification for HACCP, ISO, BRC, and CEO.

With many years of experience in industry we have a thorough understanding of Seafood production processing: - yields, labor cost, production costs, quality control and export/logistics procedures. With knowledge across all areas of production and supply; Safe Seafood Company can offer best products and service at competitive price to our customers.

Our policy is:

We always aim to be customer's fellow traveller, offering best products, produced in best conditions for safety, quality and competitive price.

We believe our customer's development and business success is our company's existence and strives for long term business relationships. When working with Safe Seafood Company customers will receive comfort through communicating in their mother language and can be assured of sincere advice, accurate information and friendship, giving customers the confidence they have made the right decisions in the seafood business.

With current customer awareness and emphasis on food safety and quality, together with the increasingly stringent requirements of export markets; Safe Seafood realizes that to be competitive they need to focus on product quality and safety, to meet the international standards.

Safe Seafood Company only cooperates with factories with modern technology and equipment and actively promotes the concept of Hazard Analysis Critical Control Point (HACCP) to the fish

processing industry. We also encourage best hygiene standards for handling, sanitation and quality control.
